Name	: Amirul Bin Abd Latib
Phone Number	: +601164134572
Email	: amirulal73@gmail.com
Portfolio:	: https://amirul.app

Technical Skills

Programming Language: PHP, Python, Javascript, SQL

Frontend: HTML, CSS, JavaScript, jQuery, Filament, Bootstrap, Tailwind CSS, Vue.js, Nuxt.js, React.js, Next.js, Vite

Backend: Laravel, FastAPI, REST API, PHPUnit

Database: MySQL, SQLite, PostgreSQL, vector databases (Weaviate, FAISS, Chroma DB)

Tools/Cloud/DevOps: AWS Lightsail, Digital Ocean, Docker, Linux, Git, GitHub, GitLab, Alibaba Cloud, Cloudways, Nginx, Apache, Postman

API/Payment Gateway: Stripe, Payex, Google SSO login, Fixer API, Gemini, OpenAI, Ollama, Google Maps API

Experience

Zanko Sdn Bhd
Onsite

Programmer   August 2025 – Present

- Developed and maintained web applications by building, optimizing, and securing both front-end and back-end systems using PHP, JavaScript, and related technologies.
- Collaborated with system analysts and team members in Agile workflows to deliver high-quality, scalable, and reliable software solutions.
- Tested, troubleshooted, and improved applications to resolve technical issues and continuously enhance performance and user experience.

BULB Communique Sdn Bhd
Remote

Web Application Developer - (Part time Contract)   May 2025 – August 2025

- Maintain, extend, and optimize Laravel, jQuery, MySQL, and bootstrap web application, while advising on application security and database design best practices.
- Collaborate with cross-functional teams including AI engineer, UI/UX designer, and system analyst to deliver scalable, user-focused solutions.
- Independently manage feature development, deployments, and troubleshooting using Linux command line server administration.

ALPHV TECHNOLOGIES SDN BHD
Hybrid

Junior Fullstack Developer + AI/LLM engineer   July 2024 – April 2025

- Developed and maintained full-stack web applications using Laravel and MySQL, implementing secure payment integrations and optimizing application performance.
- Managed cloud infrastructure on Digital Ocean, handling application deployments, server configurations, and database optimization to ensure reliable system delivery.
- Supported team growth through intern mentoring, code reviews, and sharing current technologies with teammates while working in an Agile environment to deliver business solutions.
- Automated LLM integration processes, minimizing manual effort and driving productivity gains across the team and client projects.
- Conducted research, development, and implementation of generative AI applications in NLP and LLMs, while ensuring full data privacy compliance.

Tech Generalist Intern   March 2024 – June 2024
- Designed intuitive web prototypes using Figma and UIzard to enhance user experience as UI/UX designer.
- Developed scalable full-stack web applications utilizing Laravel, MySQL, Livewire, Bootstrap, and integrated third-party API in a Full-stack Development role.
- Deployed and managed web applications on cloud platforms (Cloud ways, Digital Ocean), leveraging Nginx web server and streamlining CI/CD pipelines as DevOps

Project Contribution

Job Platform System | Laravel, Livewire, MySQL, Bootstrap, GitLab, Google Analytics, SEO Optimization, PHPUnit, Digital Ocean, Linux, Gemini LLM
- Built and managed a complete job board platform using Laravel, MySQL, Livewire, and Bootstrap, integrating payment and currency APIs for seamless transactions.
- Deployed and optimized the system on DigitalOcean with Nginx, improving speed, SEO (85% SEMrush score), and operational efficiency through workflow automation.
- Strengthened reliability and security through thorough testing and reviews, preventing vulnerabilities like XSS and SQL injection.

Talent Management System | Laravel, Bootstrap, jQuery, MySQL, GitLab, Linux, Digital Ocean
- Effectively communicated with stakeholders to gather and implement feature requirements, ensuring accurate alignment with project goals.
- Collaborated closely with senior developers to troubleshoot complex bugs and resolve issues, contributing to improved system stability and overall performance.
- Demonstrated teamwork and learning agility by actively participating in code reviews, assisting senior team members, and contributing insights for process improvements.

Hobby Project

Personal Finance Management System | Laravel, Nuxt.js, Vue.js, MySQL, Tailwind CSS, API development and integration
- Built a full-stack financial management system using Nuxt.js, Tailwind CSS, Laravel API, MySQL, and Sanctum for secure user authentication.
- Implemented modular account, transaction, and category management with real-time balance synchronization and policy-based access control.
- Engineered with a reliable backend architecture ensuring user-specific data isolation, secure API endpoints, and efficient data handling.

Academics

Bachelor of Computer Science (Hons.) Multimedia Computing   Universiti Teknologi Mara
Foundation in Physical Science – CGPA 4.00   University of Malaya
Sijil Pelajaran Malaysia – 5A+ 4A   Sekolah Menengah Sains Hulu Selangor
